## ART AND DESIGN

**Study Level**  
A- level

**Contact Details**  
**Subject Leader**  
Miss T Harris ([tharris@bishopheber.cheshire.sch.uk](mailto:tharris@bishopheber.cheshire.sch.uk))

**Course**      **A-level Art and Design**

### Why study this subject?

Art and Design A-level offers the opportunity to really stretch the creative ability of students and we are proud to celebrate former students being accepted at internationally renowned prestigious art schools. A growing number of our students also successfully continue to study Architecture, History of Art and Graphic Design.

Students enjoy excellent support and varied schemes of study. The course is enhanced by varied trips and visits. We run an unendorsed Art and Design A-level which allows students to explore an exciting variety of both two and three-dimensional art as well as digital media and materials, encouraging experimentation, diversity and creative risk-taking.

### Course Outline

**Component 1:** Personal Investigation  
A practical investigation supported by written material. There will be a broad-based starting point in Year 12 set by the Art Department, such as: 'Contamination'.  
This will involve initial skills-based workshops, followed by individual development of ideas leading to a deeper, focussed and independently led personal investigation. It will develop from initial intentions and evidence research, develop ideas and relate your work in meaningful ways to relevant critical/contextual materials.  
This portfolio is supported by an essay.

**Component 2:** Externally set assignment  
You will receive an AQA list of varied starting points from which to produce a visual response, with up to eight weeks preparatory time and culminating in the production of a final outcome within 15 hours controlled time.

### Where might it lead?

If you are interested in pursuing a career in any of the creative industries such as Advertising, Architecture, Art, Crafts, Fashion, Film, Gaming Industries, Publishing or Graphics, then the Art and Design A-level course is a valuable choice for you to consider. The subject promotes real independent and creative thinking which are in high demand within the jobs market. The creative industries are thriving in the UK and have grown at double the rate of the economy as a whole during the last 10 years.

# ART AND DESIGN

**Entry Requirements: English Language, Maths and three other subjects at Grade 4 and above**

**Course breakdown and how the course will be assessed:**

<b>Examining Board:</b>	AQA
<b>Requirements:</b>	<p><b>Component 1 (60%):</b> Personal Investigation supported by an essay of 1000-3000 words</p> <p><b>Component 2 (40%):</b> Final exam (15 hours)</p>
<b>Examination Requirements:</b>	<ul style="list-style-type: none"> <li>• Preparatory Period (beginning February 1st) followed by 15 hours of supervised exam in April.</li> </ul>
<b>Final Completion Date:</b>	<ul style="list-style-type: none"> <li>• Summer of Year 13</li> </ul>
<b>Intermediate Dates:</b>	<ul style="list-style-type: none"> <li>• 2 hour Mock exam in June of Year 12 (Artist Research presentation)</li> <li>• Completion of Personal investigation in January of Year 13.</li> </ul>
<b>Additional Comments:</b>	<ul style="list-style-type: none"> <li>• All subject content aims to introduce a variety of media and processes in order to improve and broaden skills as well as develop knowledge, understanding and independent learning.</li> <li>• Students will demonstrate, through extended creative responses, their ability to draw together different areas of knowledge, skills and understanding from across their course study.</li> <li>• Sketchbooks and Portfolios will be offered to students at a reduced cost.</li> <li>• Keep up to date with Exhibitions and the coverage of Art topics in the media.</li> </ul>
<b>Websites:</b>	<ul style="list-style-type: none"> <li>• <a href="http://artuk.org/">http://artuk.org/</a> (Art UK is a joint initiative between the Public Catalogue Foundation (now known as Art UK), 3,000 museums and other art collections, and the BBC. Great informative website.)</li> <li>• <a href="http://www.theguardian.com/artanddesign/art">http://www.theguardian.com/artanddesign/art</a> (A leading source for arts news and articles.)</li> <li>• <a href="http://www.emptykingdom.com/">http://www.emptykingdom.com/</a> (A group of artists, writers, filmmakers, musicians, designers, and thinkers busy overturning all the rules and trying to make the world a better place!)</li> <li>• <a href="http://designcollector.net/">http://designcollector.net/</a> (Art, design, illustration, photography, music, motion and visual overdose).</li> </ul>

## BIOLOGY

**Study Level**      **Contact Details**  
**A-level**            **Head of Biology**  
 Miss N Weedall ([nweedall@bishopheber.cheshire.sch.uk](mailto:nweedall@bishopheber.cheshire.sch.uk))

**Course**            **A-level Biology**

Why study this subject?

Biology is a key subject for lots of STEM careers, particularly in healthcare, medicine and jobs including plants and animals. The list is pretty long and includes: nursing, dentistry, forensic science, psychology, physiotherapy, botany, environmental science, zoology, geology, oceanology, pharmaceuticals, energy, teaching, science writing, genetics and research. Whilst a key course for those considering careers in the biological field. Biology is excellent preparation for non-scientific careers, thanks to the skills it provides.

Course Outline

Where might it lead?

**6 units covered over 2 years.**

- 1 Development of practical skills in biology
- 2 Foundations in biology
- 3 Exchange and transport
- 4 Biodiversity, evolution and disease
- 5 Communication, homeostasis and energy
- 6 Genetics, evolution and ecosystems.

Including 12 Required Practicals

**Possible career options**

Studying A-level Biology at university gives you all sorts of exciting career options, including:

- Clinical molecular geneticist
- Dentist
- Marine Biologist
- Medicine
- Nature Conservation Officer
- Pharmacologist
- Research Scientist
- Secondary school teacher
- Veterinarian

**Possible degree options**

The top seven degree courses taken by students who have an A-level in Biology are:

- Biology
- Medicine
- Psychology
- Physiology and Pathology Pharmacology
- Sport and Exercise Science
- Toxicology and Pharmacy Chemistry.

## BUSINESS

**Study Level**      **Contact Details**

**BTEC Level 3**      **Subject Leader**

Mr B Lonergan ([blonergan@bishopheber.cheshire.sch.uk](mailto:blonergan@bishopheber.cheshire.sch.uk))

**Course**              **BTEC National Level 3 Extended Certificate (equivalent to one A-level)**

### Why study this subject?

Business is a dynamic course that examines the fast-paced and ever changing business environment and current affairs in the wider world and prepares you with essential life skills. The Extended Certificate is for learners who are interested in learning about the business sector, with a view to progressing to a wide range of higher education courses or apprenticeship positions, not necessarily in business-related subjects.

The emphasis on this course is based very much on you acquiring the essential skills demanded by industry. Progress is made by successful completion of four units of study, two of which are assessed by coursework alongside two external examinations. This course will include several external visits to relevant businesses to give more context to the content taught and enhance learning outside of the classroom.

### Course Outline

**Topic 1 – Exploring Business (25% of final grade)**  
Learners study the purposes of different businesses, their structure, the effect of the external environment, and how they need to be innovative to survive.

**Topic 2 – Developing a Marketing Campaign (25% of final grade)**  
Learners will gain skills relating to, and an understanding of, how a marketing campaign is developed.

**Topic 3 – Personal and Business Finance (33% of final grade)**  
Learners study the purpose and importance of personal and business finance. Developing the skills and knowledge needed to understand, analyse and prepare financial information.

**Topic 4 – Recruitment and Selection (17% of final grade)**  
Learners explore how the recruitment process is carried out in a business. The unit gives learners the opportunity to participate in selection interviews and review their performance.

### Where might it lead?

Business is a growth subject which equips students with an understanding of the business environment and will also develop their everyday life skills required in the outside world. The subject is increasingly popular as an option as it engages students with real life current business examples, relevant in today's global workplace. Students are encouraged to work independently and acquire research which they will then analyse and evaluate.

Roles requiring business acumen and analytical skills are invaluable, opening up student choices of pursuing University or entry level positions in industry and apprenticeships.

All the skills learnt are transferable to other subjects and provide a foundation for those considering the subject at University. This respected course has led to many students pursuing careers in: Business, Human Resource Management, International Business, Advertising and Marketing and many others.

## CHEMISTRY

**Study Level**      **Contact Details**  
**A-level**            **Head of Chemistry**  
Dr S Clark (sclark@bishopheber.cheshire.sch.uk)

**Course**            **A-level Chemistry**

Why study this subject?

- Chemistry is the 'Central Science', it connects all other sciences to each other.
- A-level extends the ideas introduced at GCSE to give a greater insight into how and why compounds are formed, why reactions occur or don't and why we exist.
- It introduces the fundamental ideas of chemistry to enable specialisms in Biochemistry, Physical Chemistry or Inorganic Chemistry at degree level.
- It develops essential skills prized by employers including; problem solving, written and oral communication, monitoring/recording of data, analysis and time management.

Course Outline

Where might it lead?

**Year 12**

**Physical** - Atomic structure, Amount of substance, Bonding, Energetics, Kinetics. Chemical Equilibria, Redox

**Inorganic** - Periodicity, Group II, Group VII

**Organic** – Isomerism, Alkanes, Halogenoalkanes, Alkenes, Alcohols, Organic Analysis, IR spectroscopy, Mass spectroscopy

**Year 13**

**Physical** – Thermodynamics, Rate Equations, Equilibrium Constants  $K_c$  and  $K_p$ , Acid and Base Equilibria, Buffers, Electrode Potentials and Electrochemical Cells

**Inorganic** – Properties of Period 3 elements and oxides, Transition metals, Reactions of Ions in aqueous solutions

**Organic** – Optical isomerism, Aldehydes and Ketones, Carboxylic acids, Esters, Acyl Chlorides, Aromatic chemistry, Amines, Polymers, Amino acids, Proteins, DNA, Organic synthesis, NMR spectroscopy

Chemistry is an excellent basis to study a great many vocational courses at university. Chemistry is a challenging and highly respected subject at Universities and will lead to a huge range of traditional and diverse career opportunities. The skills required to achieve well at A-level are transferable to any profession.

The opportunities are endless and include:

Biomedicine  
Chemical Engineering  
Cosmetics Research  
Dentistry  
Environmental Science  
Forensic Science  
Manufacturing industries  
Medicine  
Oceanography  
Pharmacy  
Science and Technology  
Scientific Research  
Veterinary

# COMPUTER SCIENCE

**Study Level**      **Contact Details**  
**A-level**            **Subject Leader**  
                              Dr D Harris ([dharris@bishopheber.cheshire.sch.uk](mailto:dharris@bishopheber.cheshire.sch.uk))

**Course**            **A-level Computer Science**

## Why study this subject?

The learner will acquire an understanding and ability to apply the fundamental principles and concepts of computer science, including: abstraction, decomposition, logic, algorithms and data representation. Also, the ability to analyse problems in computational terms through practical experience of solving such problems, including writing programs. Computer Science helps learners think creatively, innovatively, analytically, logically and critically.

## Course Outline

- Computer systems (01) (40%)**
- 2 hours and 30 minutes written paper. Contains the majority of the content of the specification and is assessed in a written paper recalling knowledge and understanding.
- Algorithms and programming (02) (40%)**
- 2 hours and 30 minutes written paper. Relates principally to problem solving skills needed by learners to apply the knowledge and understanding encountered in Component 01.
- Programming project (03) (20%)**
- Non-exam assessment. A practical portfolio based assessment with a task that is chosen by the teacher or learner and is produced in an appropriate programming language of the learner's or teacher's choice.

## Where might it lead?

There is a desperate need for computer scientists in today's economy. Companies are crying out for people who can use computers creatively by developing applications or inventing new ways to use existing hardware.

A Computer Science A-level gives learners the choice of continuing to study at university or apply for an apprenticeship in a technology company.

- **The digital age needs computer scientists**
- **Computer science students have excellent job prospects**
- **Computer scientists are needed in every type of industry**

## DRAMA

**Study Level**

A-level

**Contact Details**

**Teacher i/c Drama**

Mrs K Cawley ([kcawley@bishopheber.cheshire.sch.uk](mailto:kcawley@bishopheber.cheshire.sch.uk))

**Course**

A-level Drama

### Why study this subject?

- Develop students' interest and enjoyment in drama and theatre both as participants and as informed members of an audience, fostering an enthusiasm for and critical appreciation of the subject
- Develop understanding and appreciation of the significance of social, cultural and historical influences on the development of drama and theatre
- Experience a range of opportunities to develop a variety of dramatic and theatrical skills, enabling students to grow creatively and imaginatively in both devised and scripted work
- Integrate theory and practice through students' understanding of critical concepts and the use of specialist terminology

### Course Outline

This is a linear course with three examined components: Drama and theatre (analysis and theory), Creating original drama (practical/written) and Making theatre (practical).

**Drama and Theatre:** the students will explore and analyse two texts selected to introduce them to contrasting theatre styles:

**Hedda Gabler by Henrik Ibsen:** Hedda Gabler is a realist play that explores the role of women in the nineteenth century.

**Metamorphosis by Steven Berkoff**

Steven Berkoff's adaptation of Kafka's classic fable.

**Creating Original Drama:** In this component students will create their own piece in the style of a chosen playwright, director or theatre.

**Making Theatre:** Choose and interpret three extracts from their favourite text(s) for this component and perform their strongest piece to a live audience. The final piece will be formally examined by an AQA examiner.

Students may specialise in performing, lighting, sound, set, costume, puppets and/or directing.

### Where might it lead?

Students can be sure to gather many invaluable skills, both theatrical and transferable, to expand their horizons. Students learn to collaborate with others, think analytically and evaluate effectively.

Students who wish to pursue a career in any area of theatre or performance can then study further at drama schools or university on a variety of courses such as acting, directing, writing for performance or technical theatre. Students could work in the theatre or performing arts industry, either on stage or in one of the many backstage roles, such as theatre management, marketing, lighting, directing, arts funding, costume and staging. Whichever path a student chooses to follow, an employer or university will recognise the importance of A-level Drama and Theatre Studies because of the transferable skills it offers. Students develop the confidence to speak and present in front of others and work effectively and creatively in team as well as having a broad social, cultural and historical knowledge base.

## ENGLISH LANGUAGE

**Study Level**      **Contact Details**  
**A-level**            **Subject Leader**  
 Mrs J McWilliams ([jmcwilliams@bishopheber.cheshire.sch.uk](mailto:jmcwilliams@bishopheber.cheshire.sch.uk))

**Course**            **A-level English Language**

### Why study this subject?

English Language is an exciting and stimulating course which will transform the way you think about the language around you. You will study texts ranging from children’s books to Mills and Boon romances; MI5 job adverts to EastEnders transcripts; and recipes from 16<sup>th</sup> Century to Donald Trump’s tweets. You will understand how and why men and women speak differently; why your parents may not understand why a good thing is ‘sick’; and how babies and children learn to speak. You will understand where English came from and where it’s going. Be prepared for hard work, but huge rewards – and to realise just how fascinating the English Language is!

### Course Outline

In Year 12, students are introduced to key concepts and issues integral to the study of English Language. They will cover Spoken Language, including studying a wide range of transcripts and relevant theorists, and complete essays based on the Concepts and Issues areas of study. Alongside these, they will begin to build up an original writing portfolio and develop the skills needed to effectively analyse their own language. Key contextual information for Language Change Over Time will be covered, and students will have begun building up an understanding of the different genres covered in Language in the 21<sup>st</sup> Century. By the end of the year, students will have completed the first draft of their investigation.

In Year 13, students will cover Child Language Acquisition, and by January, will have completed their Language Change study and investigation. This then allows time for revision up until the external exams.

### Where might it lead?

A-level English Language teaches numerous skills that would be invaluable in a wide number of professions. You will present, research, analyse, evaluate, and be able to form and justify your own opinions on texts and theorists – skills that will also prepare you for further education.

Past students of English Language have gone on to study a wide range of subjects at university including Law, Marketing, Journalism, Linguistics, Creative Writing and History.

Finally, in the words of David Crystal, the foremost expert on English Language:  
*‘English has no independent existence apart from the people who use it. It is not an end in itself: it is a means to an end of understanding who you are and what society is like.’*

## ENGLISH LITERATURE

**Study Level**  
A-level

**Contact Details**  
**Subject Leader**

Mrs J McWilliams ([jmcwilliams@bishopheber.cheshire.sch.uk](mailto:jmcwilliams@bishopheber.cheshire.sch.uk))

**Course**

**A-level English Literature**

### Why study this subject?

If you love watching characters and conflicts come to life in a powerful play, seeing the world afresh through the striking imagery of a poem, and think of reading as “chocolate for the brain” then English Literature is the A-level for you. English Literature is an imaginative and creative subject, allowing you to take on new perspectives, travel back in time and to explore and challenge ideas and values. It is also an analytical academic subject much valued by universities. By exploring the craft behind a text, you will sharpen your skills in close analysis and gain a greater appreciation of the power of language. By connecting that text to other texts, contextual influences and critical opinions, you will also develop key skills in independent research, cross referencing and interpretation, showing that you can engage with and respond to complex ideas.

### Course Outline

In Year 12, students will look in detail at the Shakespeare play for component 2 and cover both the work of the pre-1900 poet and the two post-1900 poets for component 1 poetry. Students begin coursework preparation in lessons, although they should start their independent preparation for this from September, beginning by reading the chosen prose texts.

As students move into Year 13, they will cover the two drama texts for component 2 section B and approach component 3, unseen poetry and prose.

As well as developing their understanding of and engagement with the content of the different texts and genres studied, throughout the course students will build up their essay writing skills, beginning by writing focused pieces on key poems or extracts and gradually broadening and deepening their analysis by considering the impact of wider literary and social contexts, engaging with critical opinions and, where relevant, looking at comparisons between writers and texts.

### Where might it lead?

With its focus on analysis, interpretation and discussion, as well as its scope for research and independent thinking, English Literature is both a well-regarded academic subject on its own or as a gateway to a wide range of other university subjects.

Beyond university, an A-level in English Literature is also a strong foundation for any job which involves communication, writing or literary knowledge, such as advertising, marketing, journalism, the law, teaching, performing arts, media, linguistics or business.

You might also be surprised by the relevance of English Literature to careers in science, technology or maths, where communicating with others and writing proposals or academic papers are essential to developing projects or securing funding.

## EPQ

**Study Level**  
A-level

**Contact Details**  
Teacher i/c EPQ

Mrs R Abbotson ([rabbotson@bishopheber.cheshire.sch.uk](mailto:rabbotson@bishopheber.cheshire.sch.uk))

**Course**

A-level EPQ

### Why study this subject?

This subject is ideally suited to self-motivated and dedicated students who are looking to stretch themselves mentally and intellectually in preparation for the demands of higher education. It involves planning, researching and writing a project of approximately 5,000 words on a topic chosen by the student and agreed with the Supervisor and Centre Co-Ordinator in school. This cannot overlap with the content any other qualification being studied, but can be related to topics students are interested in exploring further. Unlike coursework in traditional subjects, this is completed independently with guidance provided by an allocated Supervisor. They can act as a sounding board for ideas and provide some direction and support to students, but the project is designed to be completed independently in preparation for the style of study at undergraduate level.

### Course Outline

- Students will have the option of studying for the EPQ as part of the Enrichment programme in Year 12. They will be timetabled one hour a week with a Supervisor who will provide a mixture of taught sessions, seminars and 1-2-1 discussions/support.
- Students are expected to spend approximately of 120 hours of their own time completing their project.
- Students are also required to complete a Production Log (Diary) of their work along with an appendix of evidence to support their EPQ.

### Where might it lead?

The EPQ is an excellent basis for undergraduate study in the most competitive courses and institutions. It is increasingly respected for the skills and independence it develops in students. However, it cannot be allowed to become a distraction to students other studies and so they should consider carefully if the EPQ is suitable for them.

# EPQ

**Entry Requirements: English Language, Maths and three other subjects at Grade 5 and above.**

## **Course Breakdown and how the course will be assessed**

<b>Examining Board:</b>	AQA
<b>Requirements:</b>	<ul style="list-style-type: none"><li>• Year 12 – 5,000 Word Project with Production Log.</li></ul>
<b>Examination Requirements:</b>	<ul style="list-style-type: none"><li>• Completed Project (5,000 words).</li><li>• Completed Production Log.</li><li>• Presentation.</li></ul>

## FRENCH

**Study Level**  
A-level

**Contact Details**  
**Subject Leader**

Mr. D. Blanchard ([dblanchard@bishopheber.cheshire.sch.uk](mailto:dblanchard@bishopheber.cheshire.sch.uk))

**Course:**

**A-level French.**

### Why study this subject?

Students studying an A-level Languages course can expect to explore the language, culture and society of the country or countries where the language is spoken. In turn students can expect to:

- enhance their linguistic skills and promote and develop their capacity for critical thinking.
- develop control of the language system to convey meaning for both practical and intellectual purposes.
- develop their ability to interact effectively with users of the language, including through online media.
- develop language learning skills and strategies to build fluency and confidence.
- engage critically with intellectually stimulating texts and films in the original language.
- develop their capacity for critical and analytical thinking through the language of study.
- develop as independent researchers through the language of study.

### Course Outline

The A-level course is a two year course that is taught alongside a comprehensive grammar programme. Topics include social issues and trends, political and artistic culture and literary texts and films. Three papers assess all four key skills; listening, speaking reading and writing at the end of the two year course. Students also carry out an assessed individual research project on an area of study related to the target language country.

### Where might it lead?

Modern languages are a highly respected and valued academic qualification by employers. Post A-level the ability to combine a foreign language with any other subject at University is a very popular pathway. From single honours degrees, to joint language degrees or combining business and management with a foreign language, there is always a higher level course that allows flexibility to continue studying a language. Employers regard language skills as a desirable quality and students studying a foreign language have gone on to careers in translating, travel, tourism, management, teaching, recruitment, IT, border control, security services, policing and many more.

## FURTHER MATHEMATICS

**Study Level**  
A-level

**Contact Details**  
**Subject Leader**

Mr C McMullan ([cmcmullan@bishopheber.cheshire.sch.uk](mailto:cmcmullan@bishopheber.cheshire.sch.uk))

**Course**

**A-level Further Mathematics**

### Why study this subject?

Mathematics is a vast subject, with many different branches to explore. Further Mathematics allows students to widen their field of understanding and will provide them with an enriched set of skills to take onto their chosen career path.

The course is a great challenge for the most able mathematicians. For most science, technology, engineering and mathematics (STEM) degree courses A-level Mathematics is a requirement and AS or A level Further Mathematics is often a preferred subject. Anyone applying to study a degree in a STEM subject should consider taking Further Mathematics to at least AS level as the additional content helps ensure a successful progression to university.

*“Those students who had studied further mathematics to A- or AS-level standard reported coping better with the mathematical content of the degree, and as such perceived that they required less additional support throughout their studies.”* Institute of Physics ‘Mind the Gap’ report 2010.

### Course Outline

During Year 12 and Year 13 you will study additional pure mathematics alongside decision mathematics.

New concepts studied in pure maths include matrices, complex numbers, hyperbolic functions, differential equations, and more advanced calculus.

Concepts studied in decision mathematics include linear programming, critical path analysis, algorithms and graphs, and game theory.

### Where might it lead?

Further Mathematics can make you stand out from the crowd, opening up doors to both the most prestigious university courses and employment opportunities. Careers for men and women with good mathematics skills and qualifications are not only well paid, but they are also often interesting and rewarding.

Careers in physics, engineering, market research, accountancy, logistics, games design, computer programming, encryption and security are just some, which rely heavily on mathematical skills.

# GEOGRAPHY

**Study Level**  
A-level

**Contact Details**  
**Subject Leader**  
Mr A Cummings ([acummings@bishopheber.cheshire.sch.uk](mailto:acummings@bishopheber.cheshire.sch.uk))

**Course**      **A-level Geography**

## Why study this subject?

Geography matters. That’s why our course cover a wide range of contemporary themes and issues, so you can understand the world around us and what could impact its future.  
The world needs geographers. It’s well known that studying geography leads to a wealth of further study and career opportunities. You will be equipped with the knowledge and skills to succeed in your next step.

*“Geography is a subject which holds the key to our future.”* Michael Palin

## Course Outline

1. Dynamic Landscapes
  - Tectonic Processes & Hazards
  - Coastal Landscapes and Change
2. Dynamic Places
  - Diverse Places
  - Globalisation
3. Physical Systems and Sustainability
  - The Water Cycle and Water Insecurity
  - The Carbon Cycle and Energy Security
4. Human Systems and Geopolitics.
  - Superpowers
  - Health, Human Rights and Intervention

There are four compulsory fieldwork days over the two years (two of which are residential).

## Where might it lead?

Geography is a highly respected and valued academic qualification by employers.

Jobs related to geography:

- Cartographer
- Commercial/residential surveyor
- Environmental consultant
- Geographical information systems officer
- Town planner
- International aid/development worker
- Landscape architect
- Nature conservation officer
- Sustainability consultant
- Tourism officer

## Why study this subject?

It is interesting and relevant to the world you live in.

Challenging academic qualification that is highly valued by Universities and employers.  
Interesting and varied topics studied over the two years give time to fully understand the course content.

You develop the skills needed to research and present key arguments, develop an understanding of different interpretations, analysing and evaluating evidence and reach and form substantial judgements and conclusions.

## Course Outline

- Unit 1 – Tsarist and Communist Russia, 1855-1964**
  - A breadth study of Russian history, from the last Tsars, through the Russian Revolution to the Communist era of Lenin, Stalin and Khrushchev.
- Unit 2 – The Making of Modern Britain, 1951-2007**
  - A depth study of modern British history, covering political, social and economic developments.
- Unit 3 – Non-Examination Assessment: The causes of the American Civil War**
  - Coursework of c. 4,500 words analysing the causes of the American Civil War.

## Where might it lead?

History is a highly respected and valued academic qualification by employers. The subject is very popular as we cover interesting topics that are engaging and cover significant moments in British and world history. The course demands dedication, reading and research skills; explanation and analytical skills; the ability to understand different interpretations of events; using and evaluating evidence and forming detailed arguments and conclusions. The skills learnt are transferable to other written and analytical subjects and are an excellent basis for University education. The academic rigour and development of these skills makes it such a well-respected qualification and it has led many former students onto varied careers such as journalism, law, archaeology, politics, teaching, museum curator, conservation and the civil service.

## MATHEMATICS

**Study Level**  
A-level

**Contact Details**  
**Subject Leader**

Mr C McMullan ([cmcmullan@bishopheber.cheshire.sch.uk](mailto:cmcmullan@bishopheber.cheshire.sch.uk))

**Course**

**A-level Mathematics**

### Why study this subject?

It would be difficult today (perhaps impossible) to live a normal life without making use of Mathematics of some kind. Mathematics is fundamental to all scientific and technological work, from experiments that rely on mathematical models, to developing the computers on which they run. The skills you learn in A-level Mathematics are of great benefit to other subjects, and for progression to many courses at university it is important to have strong mathematics skills. For most science, technology, engineering and mathematics (STEM) degree courses A-level Mathematics is a requirement. Employers highly value mathematics qualifications as students become better at thinking logically and analytically, and are able to formulate reasoned arguments. Importantly, you will have excellent numeracy skills and the ability to process and interpret data. It is also a most satisfying, challenging, and rewarding subject to study in its own right.

### Course Outline

During Year 12 you will develop your existing skills in pure mathematics, learning new concepts such as calculus, exponentials and logarithms. You will also apply your skills to the study of mechanics, learning about forces, Newton's Laws, moments, and kinematics. During Year 13 you will further advance your pure maths skills by learning about topics such as parametric equations, partial fractions and numerical methods such as Newton-Raphson. You will also study statistics, developing your understanding of probability, statistical sampling, statistical distributions and hypothesis testing.

### Where might it lead?

Mathematics is a versatile qualification, well respected by employers, and a "facilitating" subject for entry to higher education. Careers for men and women with good mathematics skills and qualifications are not only well paid, but they are also often interesting and rewarding. Careers in physics, engineering, market research, accountancy, logistics, games design, computer programming, encryption and security are just some, which rely heavily on mathematical skills.

## MEDIA STUDIES

**Study Level**      **Contact Details**  
**A-level**            **Teacher i/c Media Studies**  
Mr M Parsons ([mparsons@bishopheber.cheshire.sch.uk](mailto:mparsons@bishopheber.cheshire.sch.uk))

**Course**            **A-level Media**

### Why study this subject?

Studying Media Studies A-level enables students to further their understanding of products, technologies and industries that they are most likely already familiar with. The A-level is incredibly broad covering a total of nine different media forms such as Advertising, Film, News and Video Games. Each form of media is studied through a specific set of concepts and with set products that students will be required to write about in their exam. Over the two year course students will be assessed in different ways such as extended writing and production skills. The production depends on the brief that is set by the exam board and students can be asked to produce any of the following: Music Video, Magazine, Television or Radio with the final production being worth 30% of the A-level.

### Course Outline

In Year 12, the course of study will begin with an introduction to the subject for all students followed by a practical task where they will have to demonstrate their knowledge. The Autumn and Spring terms will consist mainly of studying exam topics, covering forms of media such as Film, Advertising, Music Video, Magazine, Radio and Video Games. Each of the different topics will have set media products that students will have to analyse in detail. The Summer term of Year 12 will see the students responding to the production brief sent by the exam board, this will be their opportunity to produce their own media. A wide variety of theory and academic perspectives are required to be understood and applied to all of the topics studied in Year 13. Exam preparation will continue with a focus on TV and print and online news. Students will sit two exam papers at the end of the course.

### Where might it lead?

There are a number of pathways that an A-level in Media Studies can offer students. Beyond Sixth Form, students can seek out apprenticeships in the creative industries or even employment within the sector. "Industries including advertising and marketing, arts and film, TV and radio, and museums and galleries are all part of this thriving economic sector, which is now worth almost £92bn". (Department for Digital, Culture, Media & Sport, November, 2017) Another popular choice for students is to go to university to specialise in one particular area of media such as TV production, journalism or web design. The A-level offers students the chance to study across all forms of media but there may also be a particular area they gain a specialist interest in which could be furthered and developed at university.

# PHYSICAL EDUCATION

**Study Level**  
A-level

**Contact Details**  
**Subject Leader**  
Mr M.Lindley ([mlindley@bishopheber.cheshire.sch.uk](mailto:mlindley@bishopheber.cheshire.sch.uk))

**Course**      **A-level Physical Education**

## Why study this subject?

The course provides a natural progression from GCSE PE by extending knowledge of skills, techniques and effective performance. It provides a transition for those hoping to study related courses in Higher Education and an understanding of the importance of exercise and activity. There are two written exam papers that account for 70% of the A-level Award, and 30% is NEA (Non-Examined Assessment) which incorporates one practical assessment and a piece of Evaluation/Analysis of performance.

## Course Outline

The list of topics studied across the course consists of:

1. Applied anatomy and physiology
2. Skill acquisition
3. Sport and society
4. Exercise physiology
5. Biomechanical movement
6. Sport psychology
7. Sport and society and the role of technology in physical activity and sport

In the practical areas, the candidate must demonstrate the ability to perform a range of core and advanced skills to a high level within a high performance context. They need to analyse and critically evaluate their own and others physical performance and apply their knowledge of the theoretical principles and concepts of their activity to help them improve their level of work. Candidates need to continually undertake physical activity both in and out of school especially in their chosen activities

## Where might it lead?

A-level Physical Education is an excellent base for a university degree in sports science, sports management, healthcare, or exercise and health.

Physical Education can also complement further study in biology, human biology, physics, psychology, nutrition, sociology and many more.

A-level Physical Education can open up a range of career opportunities including: sports development, sports coaching, physiotherapy, personal training or becoming one of the next generation of PE teachers. The transferable skills you learn through your study of Physical Education, such as decision making and independent thinking are also useful in any career path you choose to take.

# POLITICS

**Study Level**      **Contact Details**

**A-level**            **Subject Leader**

Mr J Penlington ([jpenlington@bishopheber.cheshire.sch.uk](mailto:jpenlington@bishopheber.cheshire.sch.uk))

Mrs C Williams ([cwilliams@bishopheber.cheshire.sch.uk](mailto:cwilliams@bishopheber.cheshire.sch.uk))

**Course**            **A-level Politics**

### Why study this subject?

- It is incredibly interesting, relevant to the world you live in, involves current affairs and is therefore very current and ever changing. The study of Politics can also complement other A-level subjects on offer such as History, Economics and Sociology to name a few.
- You develop the skills needed to present key arguments, understand different political ideologies and viewpoints, analyse and evaluate our current political system and enhance your essay writing skills and ability to form substantiated judgements and conclusions.

### Course Outline

**Unit 1 – UK Politics & Core Political Ideologies**

- A study of political participation including political parties, electoral systems and voting behaviour
- A study of Conservatism, Liberalism and Socialism

**Unit 2 – UK Government & Non-Core political ideology**

- A study of UK government including the constitution, parliament, law courts the Prime Minister and executive.
- A study of either anarchism or feminism.

**Unit 3 – USA Comparative Politics**

- A comparative study of American politics including the US Constitution, congress, elections and the US Presidency.

### Where might it lead?

Politics is a well-respected qualification and a significant proportion of students who take the subject go on to study some form of Politics at University, evidencing the popularity of the course. Undergraduate study of International Relations and Philosophy, Politics and Economic (PPE) are common. The varied topics that are covered offer a highly engaging course and the subject is popular with students appreciating its contemporary nature. The skills learnt are transferable to other written and analytical subjects and are an excellent basis for University education. The academic rigour and development of these skills makes it such a well-respected qualification and it has led many former students onto varied careers some directly in politics but also law, humanitarian work, journalism, law and the civil service.

**Study Level**  
A-level

**Contact Details**  
**Subject Leader**  
Miss J Stockley ([jstockley@bishopheber.cheshire.sch.uk](mailto:jstockley@bishopheber.cheshire.sch.uk))

**Course**            **A-level Product Design**

## Why study this subject?

- Are you interested in designers past and present?
- Are you interested in technologies and how they have changed the course of industrial manufacturing?
- Could you design the next mobile phone, electric car, ergonomically perfect chair or waterproof jacket?

## Course Outline

Paper 1 Written Exam – 2.5 hours (30%)  
Core technical principles. Additional specialist knowledge.

Paper 2 Written Exam – 1.5 hours (20%)  
Designing and making principles

Non-examined assessment substantial design and make task – 45 hours (50%)  
Practical application of technical principles, designing and making principles, specialist knowledge

## Where might it lead?

Specifically Design and Technology can lead to employment in such careers as architecture, product design, engineering, manufacturing, graphic design, advertising, fashion design, quantity and building surveying and illustration.

### Careers in Design and Technology

*“The innovation that fuels UK growth relies on knowledge, the skilled use of materials and the command of ideas. Design and the Arts are vital components of an accessible and varied education system that can provide these skills.”*

**Sir Jonathan Ive, Stella McCartney, Sir Terence Conran (and others)**

- from an open letter to Michel Gove

**AS & A-level**    **Subject Leader**  
 Mrs P Mullan ([pmullan@bishopheber.cheshire.sch.uk](mailto:pmullan@bishopheber.cheshire.sch.uk))

**Course**            **A-level Psychology**

## Why study this subject?

A-level Psychology will give you an understanding of the way people think and why people behave in certain ways.  
 You will learn a variety of skills including analytical thinking, improved communication, problem solving and many more that will prepare you for an exciting future with the possibility of a range of fantastic careers.

## Course Outline

### Unit 1:

- Social influence
- Memory
- Attachment
- Psychopathology

### Unit 2:

- Research methods
- Approaches in Psychology
- Biopsychology

### Unit 3:

- Relationships
- Schizophrenia
- Aggression
- Issues and debates

## Where might it lead?

Having an A-level in Psychology forms an excellent basis for a career working with or managing people. Psychology is a well-respected qualification and a large number of students who study the subject at Heber go on to complete Psychology related courses at University.

These degree courses include; Psychology, Criminology, Sociology, Business studies, Teaching, Sport and Exercise Science and Law.

Studying Psychology at university can give you a whole host of exciting career options, including:

- Accountancy
- Business Development
- Clinical Psychology
- Human Resources
- Forensic Psychology
- Marketing
- Nursing
- Occupational therapy
- Teaching

# SOCIOLOGY

**Study Level**  
A-level

**Contact Details**  
**Teacher i/c Sociology**  
Mrs K Becousse ([kbecousse@bishopheber.cheshire.sch.uk](mailto:kbecousse@bishopheber.cheshire.sch.uk))

**Course**      **A-level Sociology**

## Why study this subject?

Sociology is about the world in which we live in. It will help you to understand the structures within society. Lessons are always engaging and full of discussion. Sociology results are well above national average. It is a challenging academic qualification that is highly valued by universities and employers.

Sociology students develop excellent analytical and evaluative skills which are of worth to any academic discipline. Sociology students are able to look at the world with empathy and understanding which is beneficial to any person centred job you might be wanting in the future.

## Course Outline

## Where might it lead?

### Year 12

- Families and households
- Education
- Theory and methods

### Year 13

- Beliefs in society
- Crime and deviance
- Theory and methods

Sociology is a highly respected and valued academic qualification by employers and universities alike. The subject is very popular as we cover interesting topics that are engaging and apply to the society in which we live in. The course demands full attendance, dedication, reading, explanation and analytical skills. The skills learnt are transferable to other written and analytical subjects such as History, Politics, Psychology, English and Media Studies. Sociology provides students with an excellent basis for University education. It is a subject that will enable students to develop a social conscience which is essential for any career where you need to work and understand the needs of others. The academic rigour of the subject makes it a well-respected qualification and it has led many former students onto varied careers such as, journalism, law, nursing, social work, probation, politics, teaching, history, psychology and criminology.

## SPANISH

**Study Level**

A-level

**Contact Details****Subject Leader**Mr. D. Blanchard ([dblanchard@bishopheber.cheshire.sch.uk](mailto:dblanchard@bishopheber.cheshire.sch.uk))**Course:****A-level Spanish**

### Why study this subject?

Students studying a A-level Spanish course can expect to explore the language, culture and society of the country or countries where the language is spoken. In turn students can expect to:

- enhance their linguistic skills and promote and develop their capacity for critical thinking.
- develop control of the language system to convey meaning for both practical and intellectual purposes.
- develop their ability to interact effectively with users of the language, including through online media.
- develop language learning skills and strategies to build fluency and confidence.
- engage critically with intellectually stimulating texts and films in the original language.
- develop their capacity for critical and analytical thinking through the language of study.
- develop as independent researchers through the language of study.

### Course Outline

The A-level course is a two year course that is taught alongside a comprehensive grammar programme. Topics include social issues and trends, political and artistic culture and literary texts and films. Three papers assess all four key skills; listening, speaking reading and writing at the end of the two year course. Students also carry out an assessed individual research project on an area of study related to the target language country.

### Where might it lead?

Modern languages are a highly respected and valued academic qualification by employers. Post A-level the ability to combine a foreign language with any other subject at University is a very popular pathway. From single honours degrees, to joint language degrees or combining business and management with a foreign language, there is always a higher level course that allows flexibility to continue studying a language. Employers regard language skills as a desirable quality and students studying a foreign language have gone on to careers in translating, travel, tourism, management, teaching, recruitment, IT, border control, security services, policing and many more.

Mr M.Lindley  
([mlindley@bishopheber.cheshire.sch.uk](mailto:mlindley@bishopheber.cheshire.sch.uk))

**Course**

**BTEC Level 3 National Extended Certificate in Sport**

**Why study this subject?**

If you have a strong passion for sport, are highly motivated and interested in working in a sporting environment in the future then the BTEC Level 3 National Extended Certificate in Sport is the ideal course to follow. Employers value BTEC's approach to learning because it provides a unique combination of technical skills which help prepare students for employment, together with a breadth of knowledge about the sector that empowers them to succeed in the real world. The flexibility to build a programme of study combined with practical application, all of which is tailored directly to a student's aspirations, is proven to produce a valued candidate in the eyes of employers. In addition, the ethos of BTEC courses provides experiences that promote maturity in participants which directly enhances their employability

**Course Outline**

The BTEC Extended Certificate is an academic, practical and vocational course. You learn by completing projects and assignments that are based on realistic workplace situations in addition to a number of externally set tasks and exams. This qualification is worth the equivalent to one A level.

The course is made up of 4 units (or subjects) which cover the broad range of the sports industry. 2 of the units are assessed internally through the production of a portfolio of evidence. This evidence is generated through written assignments, presentations or practical demonstrations. 2 of the units are assessed externally through an exam and set tasks.

The internally assessed units are Sports Psychology and Professional Development in the Sports Industry. The externally assessed units- Anatomy & Physiology and Fitness Training and Programming for Health, Sport and Well-being

**Where might it lead?**

The Pearson BTEC National Extended Certificate in Sport is intended to be an Applied General qualification for post-16 learners who want to continue their education through applied learning and who aim to progress to higher education and ultimately to employment in the sport sector.

The content of this qualification has been developed in consultation with academics to ensure that it supports progression to higher education. Employers and professional bodies have also been involved and consulted to confirm that the content is appropriate and consistent with current practice for learners who may choose to enter employment directly in the sport sector. Progression routes include employment in the following fields: Sport Science, Leisure and Business Management, Marketing, Fitness Training, Coaching, Teacher Training and sports Development.

## TOURISM

**Study Level**  
**DIPLOMA**

**Contact Details**  
**Subject Leader**

Mr A Cummings ([acummings@bishopheber.cheshire.sch.uk](mailto:acummings@bishopheber.cheshire.sch.uk)),

Mr B Lonergan ([blonergan@bishopheber.cheshire.sch.uk](mailto:blonergan@bishopheber.cheshire.sch.uk))

**Course:**        **Level 3 Applied Diploma in Tourism (equivalent to one A-level)**

### Why study this subject?

Tourism is a dynamic course that examines the fast-paced and ever changing tourism industry across the globe, which presents diverse job opportunities.

The Diploma is for learners who are interested in learning about Tourism, with a view to progressing to a wide range of higher education courses or apprenticeship positions.

The emphasis on this course is based very much on you acquiring the essential skills demanded by industry. Progress is made by successful completion of four units of study, two of which are assessed by coursework alongside two external examinations.

### Course Outline

**Topic 1 – The United Kingdom Tourism product (exam 25% of final grade)**

Learners study what the UK offers to inbound and domestic tourists and the wide range of employment opportunities within this industry.

**Topic 2 – Worldwide Tourism Destinations (25% of final grade)** Learners will examine the wide range of global destinations and how these short haul and long haul countries are marketed to differing target audiences.

**Topic 3 – The Dynamic Tourism Industry (25% exam of final grade)** Learners study how Global Tourism is a dynamic industry and constantly adapting to external pressures, including environmental, technology, Geo-political and social factors.

**Topic 4 – Event and Itinerary Planning (25% of final grade)** Learners explore event management and the importance of planning UK events, considering risk assessments and financial awareness.

### Where might it lead?

Tourism is a growing sector of the global economy, this course equips students with an understanding of the tourism industry. The subject is increasingly popular as an option as it engages students with real life Tourism examples from across the globe. Students are encouraged to work independently and acquire research which they will then analyse and evaluate.

Tourism is now one of the largest employment sectors Globally, with many job opportunities to work overseas.

All the skills learnt are transferable to other subjects and provide a foundation for those considering the subject or similar subjects at University. This respected course can lead to students pursuing careers in: Airlines, Tour Operators, Cruise Lines, Tourist Attractions and Tourism boards as well as Event Management.
