

Subject	Year	Term
<b>Product Design</b>	<b>11</b>	<b>2</b>
Topic		
<b>NEA – Non-Examined Assessment</b>		
Content (Intent)		
<b>Prior Learning (Topic) NEA</b>		
<p>Students will have a clear understanding of the elements required to successfully carry out their NEA including; research and investigation, composing a design brief and specification, generating ideas, developing and modelling ideas, the iterative process and how to test and evaluate products.</p>		
Future Learning (Topic) Exam preparation		
What Knowledge and Skills will be taught (Implementation)	How will your understanding be assessed & recorded (Impact)	
<p>Pupils will be working on their own context and projects will be pupil led. They will be given an example project, assessment criteria and mini deadlines. Pupils will then drive their own projects forward aiming to meet each of the deadlines. By the end of this term pupils will have completed the following sections:</p> <p>Further development (sketch, modelling, CAD)            Final design and manufacturing plan            Materials testing            Testing against their specification            Client feedback and their evaluation            Testing and conclusion</p>	<p>The project will be formally assessed in term 3 of Year 11 with only generalised feedback being given after each deadline. No marks will be issued until the final mark is given. This is under JCQ guidelines. The pupils will have a copy of the assessment criteria and can self and peer assess throughout.</p>	
How can parents help at home?		
<p>Pupils will be expected to complete one hour of homework for each lesson of work. They will need to conduct a lot of primary research and may need to visit shops or locations in order to gather information. Pupils will also have to identify a client that they can use to help focus their project.</p> <p>Pupils will also have to attend out of hour’s workshop session to drive their project forward.</p>
