

SCIENCE	7	3																		
Topic																				
Biology – Reproduction, Chemistry – The Earth, Physics – Waves																				
Content (Intent)																				
Prior Learning (Topic) Structure and Function, Elements and Compounds and Forces																				
Students will have a basic KNOWLEDGE on the structure of cells and how specialised cells developed and furthermore how animal and plant cells are fertilised. Students will also be able to recall the structure of the Earth and types and formation of rocks within the Earth’s structure																				
Students will have a good UNDERSTANDING of the property of light and sound as waves.																				
Students will have the SKILLS to draw conclusions from observations of how the Earths structure and rock types are formed and on the properties of waves, specifically light and sound.																				
Future Learning (Topic) Health and Lifestyle, Periodic Table and Reactions, Space																				
What Knowledge and Skills will be taught (Implementation)	How will your understanding be assessed & recorded (Impact)																			
Biology - There will be a sequence of lessons of human and plant reproduction. Practical Skills – Listing observed characteristics of plants and their reproductive systems. Maths Skills – Identifying continuous and discontinuous data.	Formative Feedback Task (End of topic tests) Pupils given formative feedback only on the topics of Biology – Human and Plant reproduction Chemistry –Earths structure and resources Physics - Waves																			
Chemistry - There will be a sequence of lessons on the Earths structure, types of rocks, the rock cycle and ceramics, polymer and composites. Physics – There will be a sequence of lessons on sound and the properties of a sound wave, the ear’s structure, the eye, reflection, refraction and colour. Practical Skills – observations of rock types and observing the properties of refraction and reflection.	Assessment 2 (June) topics covering Summative assessment including: <ul style="list-style-type: none">• Enquiry Process• Structure and Function of Organisms• Elements, Atoms and Compounds• Forces																			
	All topics listed will also need to be recalled in: Year 8 Assessment 1 and 2 Year 9 Assessment 1 and 2. Pupils given a percentage, formative feedback																			
How can parents help at home?																				
Ensure all class work is completed and homework submitted on time.																				
Assist in ensuring the active use of the EDUCAKE online learning platform where each pupil is given a personal log on from their teachers.																				
Encourage pupils to revise for tests and exams and to create revision resources such as flash cards and posters.																				
Ensure all pupils have all their resources required for science lessons, including knowledge organisers, exercise books, pens and calculators																				
Helpful further reading/discussion (including Reading and Vocabulary Lists)																				
Reading Use the Educake online learning platform www.educake.co.uk/ Use BBC bitesize https://www.bbc.com/bitesize/levels/z4kw2hv Use and review the Knowledge Organisers used in class.	Vocabulary Lists <table><tr><td>Gametes</td><td>Continuous</td></tr><tr><td>Foetus</td><td>Discontinuous</td></tr><tr><td>Genetic</td><td>Refraction</td></tr><tr><td>Sedimentary</td><td>Amplitude</td></tr><tr><td>Igneous</td><td>Wavelength</td></tr><tr><td>Metamorphic</td><td>Composites</td></tr><tr><td>Ceramics</td><td>Polymers</td></tr><tr><td>Carpel</td><td>Anther</td></tr><tr><td>Cervix</td><td>Ovary</td></tr></table>		Gametes	Continuous	Foetus	Discontinuous	Genetic	Refraction	Sedimentary	Amplitude	Igneous	Wavelength	Metamorphic	Composites	Ceramics	Polymers	Carpel	Anther	Cervix	Ovary
Gametes	Continuous																			
Foetus	Discontinuous																			
Genetic	Refraction																			
Sedimentary	Amplitude																			
Igneous	Wavelength																			
Metamorphic	Composites																			
Ceramics	Polymers																			
Carpel	Anther																			
Cervix	Ovary
