

Subject		Year	Term
Art and Design		10	3
Topic			
Coursework - Construction			
Content (Intent)			
Prior Learning (Topic)		Coursework- Introduction and Initial Investigations	
Students will be encouraged to develop their theme in sculptural format. A variety of experimental constructions will be approached and these will be developed towards a resolved final piece in media appropriate to intention.			
Future Learning (Topic)		Coursework- Mock Exam Preparation	
What Knowledge and Skills will be taught (Implementation)		How will your understanding be assessed & recorded (Impact)	
Students will develop their understanding of experimental approaches to construction producing a resolved final piece or pieces which realise intentions.		Practical skills are assessed with regard to being able to review, refine and control materials, processes and techniques. (Assessment Objective 2) Final outcomes are assessed by the quality with which a student has presented a personal response which is clearly supported by their research. They will realise their intentions in a technically convincing and creative way. (Assessment Objective 4)	
Students will review their work and comment with increasing confidence on their progress. They will evaluate their outcomes and make informed connections with the work of others.		Personal annotation will be assessed by the quality of insight and understanding demonstrated. Writing will be personal and thoughtful. (Assessment objective 3)	
How can parents help at home?			
Students will be taking increased ownership of their work, developing and experimenting with increased independence. Parents can help by encouraging experimental approaches to the subject.
